

Report of the Mycoplasmosis Committee American Association  
of Avian Pathologists

1971-1972

The principal efforts of the mycoplasmosis committee during the past year have been directed towards organizing a workshop to be held July 17, 1972. The workshop program has been distributed to the AAAP membership by Dr. C. F. Hall. It is planned that the proceedings will be available as a set of abstracts of the papers presented. It is the opinion of the board that the AAAP should take responsibility for publication of the proceedings. Authors are encouraged to submit manuscripts to the journal of their choice.

A great deal of effort has been expended by the committee members in planning the workshop. The cooperation of Dr. Hofstad and Dr. Hall, as well as the AAAP executive board and the AVMA poultry section officers has been very helpful.

A summary of the workshop along with recommendations of the committee will be presented at the AAAP annual meeting as a final report.

Respectfully submitted,

S. H. Kleven, Chairman  
H. E. Adler
