

REPORT OF MEMBERSHIP COMMITTEE  
AMERICAN ASSOCIATION OF AVIAN PATHOLOGISTS

July 21, 1968

During the past year 62 applicants were approved as members of AAAP, 7 were approved as associate members and 10 applications were rejected. The awarding of two honorary memberships was also approved.

The applications that were rejected were usually disapproved for lack of sufficient experience to comply with the requirements of the By-Laws. We would urge all members who are sponsoring new members, to make sure that the person has at least three years of avian disease experience before making application.
