The election is over and the results are now known. It was real amusing to a bunch of would be Negro leaders in this city and state jumping from pillow to post, running from one headquarters to the other, asking for money to turn the colored vote, when they themselves do not know from one eye to the other where they will be. Certainly they have no principle or else they do not stand by them but rather for the money they get.

## G. A. R. ENCAMPMENT.

It has been several years since our city and perhaps never has our Greater Des Moines capitulated so easily and gracefully to the Grand Army of the Republic as they did last Wednesday when the boys of 1860 now the veterans of the Civil War knocked at the door of the metropolis of Iowa. It was the 36th Annual Encampment of Iowa and never has the reception on the part of our citizens been so generous and so much enthusiasm on the part of the veterans the entire three-day session. It was one constant feast of good things each day and each hour and why should it not be, for Iowa was one of the most loyal and furnished as brave men as ever faced the cannon's mouth and today we welcome those brave heroes who save the Union and preserve our flag, who destroyed forever slavery and established freedom. Those men made it possible for this great nation to lift up and elevate common humanity everywhere. We say all hail the boys in blue and three cheers.

## COMMENCEMENT SEASON.

We have again arrived at the end of another semester, for the youth of land, this month the final test and examination with graduation and then to higher training on in this busy world for the struggles of life. Oh the many weary hearts and anxious parents to hear of their children passing the various tests and to child itself is on the nervous seat hoping to successfully make all the grades. Thus we end our school year with commencement graduation, and farewell to Alma Mater. Oh young man the golden opportunity which lies before you is indeed enchanting to the well qualified and honest worker, hence every parent should urge your child to strive to lead, to be efficient and a place will be open to the worthy.

## RESULTS OF PRIMARIES.

Tuesday for the second time Iowa tried the new State wide primary nominating law. The law worked well for better and more satisfactory than the old regime. The results of Tuesday was a sweeping victory for the Progressives of Iowa, they carried practically all the state offices, but two and all the congressional districts but three. This was a remarkable thing for the progressives to run when they were working against odds, for the national administrator was against them. The sweeping victory for Judge S. F. Prouty over Capt. Hull was a most glorious one, and we are glad beyond expression that our district will now have a progressive as it should have.

George Cosson Nominated for Attorney General

## BOTH CLAIM THE CONVENTION

Palmer and Thorne Probably Nominated for Railway Commissioners—Race Close Between Besouquet and Garrett.

Des Moines, June 10.—State Chairman Carl F. Franke authorized the announcement that he had decided to call a meeting of the republican state central committee for next Tuesday in this city.

It will meet to select a temporary chairman and other officers of the state convention of August 3.

The names of Senator Cummins and Charles Grik of Davenport, the republican nominee for congress, have been mentioned.

The committee will be confronted with a peculiar situation. While the progressives have a majority of the votes in the state, the standpatters have nominated their candidate for governor, and the two factions claim that the convention bears their complexion.

The question of the total vote has furnished an interesting inquiry as to the interpretation of the law with respect to the total vote in case of two candidates for two places on a ticket, as in the railroad commissionship of this year.

The Returns.

The returns from eighty-three counties give for the office of railroad commissioner, Palmer 47,605, Thorne 42,304, Wilson 40,161 and Ottosen 35,581, the others having a lesser number.

For attorney general George Cosson was nominated by about 7,000 majority.

Mr. Chantland, who was next to Mr. Cosson, acknowledged defeat, assuming the figures to be correct.

The state superintendent probably will go to the state convention, although J. F. Riggs has the advantage.

## GNAT CAUSES PELLAGRA.

Committee on Disease in Europe Says Corn is Not to Blame.

London, May 14.—Dr. Sambon, a member of the Field committee which has been investigating the disease pellagra, telegraphs from Rome that the committee has definitely proved that maize or Indian corn is not the cause of pellagra.

After a short rest and a deep think the hungry one knocked at the door of the tenth house.

"Madam, can you let a hungry man have a bite to eat? I don't think you can, though," he said. The woman opened her ears.

"Why can't I?" she inquired.

"The woman next door said you didn't have enough for yourself."

He got his meal.

## A Child's View.

Scarlet fever was in the house next door and a little girl of eight had listened to the recital of what was happening. A caller came and the child attempted to entertain the stranger until her mother came into the drawing room.

She told about the trouble next door, but in the telling "broke in" and "broke out" got tangled in her child-brain.

"His face's got scarlet fever, because his face is all red and his chest is broken in!" she announced.

## THE GREAT NORTH COUNTRY.

Those Indians who made the canoe of birch bark long ago, our greatest benefactors. The children of these Indians know the canoe, and they know how to use it, and if you go to Temagami, Ontario, this summer, they will paddle your canoe in their own superb way. Students who camp in summer along the Temagami lakes are able to do two years' work in one. Finest of fishing and hunting. Easy of access by the Grand Trunk Railway System. Information and beautiful descriptive publication sent free on application to W. S. Cookson, 917 Merchants Loan & Trust Building, Chicago.

## Harvard College.

This celebrated institution is pleasantly situated in the barroom of Parker's, in School street, and has pupils from all over the country. I had a letter yesterday, by the way, from our mutual son, Artemus, Jr., who is at Bowdoin college, in Maine. He writes me that he is a Bowdoin Arab. Is it cum to this? Is this boy as I nurtured with a parent's care into his childhood's hour—is he going to be a grate American humorist? Alas, I fear it is too true. Why didn't I bind him out to the Patent Travelling Vegetable Pill Man, as was struck with his appearance at our last county fair, & wanted him to go with him and be a Pillist? Ar, these boys—they little know how the old folks worry about 'em—From Life's Reprint From Artemus' Ward.

## A Horse Lover.

James R. Keene, who is noted no less as a horseman than as a financier, said at a luncheon at his Cedarhurst residence:

"My love of horses has been a great comfort to me all my life. I have always kept my horses in their place, though. I haven't allowed them to interfere with my business.

"Some men carry their love of horses altogether too far. Such a one was a young father who stood, with his fair wife, before the crib of their first-born.

"Isn't he wonderful?" the young mother cried. "Did you ever see anything like him at twenty-six months?"

"Maternal love is all very well," the father retorted, impatiently, "but please don't try to compare it with a two-year-old thoroughbred."

## FEED CHILDREN

On Properly Selected Food. It Pays Big Dividends.

If parents will give just a little intelligent thought to the feeding of their children the difference in the health of the little folks will pay, many times over, for the small trouble.

A mother writes saying: "Our children are all so much better and stronger than they ever were before we made a change in the character of the food. We have quit using potatoes three times a day with coffee and so much meat.

"Now we give the little folks some fruit, either fresh stewed, or canned, some Grape-Nuts with cream, occasionally some soft boiled eggs, and some Postum for breakfast and supper. Then for dinner they have some meat and vegetables.

"It would be hard to realize the change in the children, they have grown so sturdy and strong, and we attribute this change to the food elements that I understand, exist in Grape-Nuts and Postum.

"A short time ago my baby was teething and had a great deal of stomach and bowel trouble. Nothing seemed to agree with him until I tried Grape-Nuts softened and mixed with rich milk, and he improved rapidly and got sturdy and well."

# TRAMP KNEW HUMAN NATURE

Simple Stratagem That Secured for "Knight of the Road" a Substantial Meal.

A clever little bit of human nature was used by a "knight of the road" recently on a matron living in a suburb of Pittsburg, and as a result he slept with a full stomach that night.

The suburb is quite small, and when the tramp dropped off a freight and ambled up the main street he was quite hungry. There were about ten houses which gave fair chance of meals, and the tramp lost no time. He was not surprised when the first housewife slammed the door in his face, nor the second, for that was natural and the proper thing to do. But when he reached the ninth house, or rather was helped away, he was thoroughly disgusted. The town certainly had him hoodooed.

After a short rest and a deep think the hungry one knocked at the door of the tenth house.

"Madam, can you let a hungry man have a bite to eat? I don't think you can, though," he said. The woman opened her ears.

"Why can't I?" she inquired.

# RAIN MARS PARADE

Thousands Brave the Wetness to See Military Pageant

## MOVE SOLDIERS' MONUMENT

Department Commander McDonald Tells G. A. R. Encampment Why Shaft Should Be Removed—Dyer Elected Commander.

Des Moines, June 10.—Recommendation that the soldiers' and sailors' monument, south of the state capitol, be moved to the east bank of the Des Moines river, opposite the city library, was made by Michael McDonald of Bayard, department commander of the G. A. R., in his annual address at the opening meeting of the department at the Auditorium. He said that this magnificent monument was now overshadowed by the state capitol building and was not serving its intended purpose. "If the city will deed to the state a sufficient plot of ground on the east side of the Des Moines river, opposite the city library, I recommend that this organization use its influence in the next legislature to pass an act authorizing and directing the removal of the monument."

Despite a slow drizzling rain the parade, the big feature of the G. A. R., encampment, was held. The parade formed on West Fourth street with the right resting on Locust street. It went east to East street, south to Walnut, west to West Eighth, north to Locust, and east to Fourth. The reviewing stand was at Fifth and Locust streets.

When we first began our wonderful work of growing all kinds, all qualities, all lengths, and all conditions of hair, even to the growing of hair on bald places of the head, many persons scorned the idea that such a thing was possible; but we have grown the hair for hundreds; rapidly achieving success. The proof of the value of our work is that we are being imitated and largely by persons whose own hair we have actually grown and the further fact that they have very frequently mentioned us when trying to sell their goods (saying that theirs is the same or "just as good") or referred to PORO. **DOUBLE PROOF.**  
Denver, Col., Aug., 1907.  
To the Public:  
I have known Mrs. T. D. Perkins more than ten years and never knew her to have hair more than two inches long until the past three years. I was more than surprised when she took her hair down to prove to me that it was all her own. I put my scalp in her charge at once and words can never express the wonderful results of her treatment. I have tried so many hair treatments that my hair was in a dreadful condition. Mrs. Perkins' first treatment proved beyond a doubt her knowledge of the care of the scalp. I trust every woman who may read this will write Mrs. Perkins and secure a place in her class for scalp treatment for beautifying and growth of the hair.  
MRS. ED. HARRIS,  
2218 Clarkson, Denver, Col.

**DANDRUFF REMOVED AND HAIR BEAUTIFIED.**  
Chester, Pa., Dec. 12, 1908.  
Dear Mrs. Perkins: I really feel it a duty to write and let you know the wonderful results I have obtained by the use of your scalp treatment. I have not only found it to be a dandruff remover, but it is also a hair beautifier. It would do you good to see how straight and black my hair is since using your treatment. Of the many preparations of this kind on the market, yours seems to be the only one that does what it claims. You certainly have discovered the true secret of beautifying the hair, and I wish you every success—and give you permission to use this letter and my name, if you like, as I feel that I cannot too highly recommend it. Wishing you a merry Christmas and a prosperous new year.  
Miss MAGGIE HO BROWN.

Perkins' wonderful treatment; blessing sent from above to women of our race. May I long, to bless our race with her wonderful treatments.

I am proud to recommend your cure to all who wish to know your great work.

My husband is very much pleased with the way my hair has grown. He thinks it is the best hair grower yet.

Perkins, the Scientific Scalp Specialist of Denver, Colo., who is astonishing the world with her wonderful art of growing hair.

My own hair is my best advertisement. With these treatments my hair grew 17 inches in two years. It had remained one length (four inches) for 15 years. What I did for my hair I am doing for hundreds of others, and will do for you with my Matchless Scientific Scalp Preparations. My treatment stops falling hair or breaking off, cures split ends, removes dandruff and scalp scurf, causes the hair to grow long, no matter how short; soft, no matter how harsh; thick, no matter how thin; straight from the blubs, no matter how kinky. First treatment will show wonderful improvement. Do not wait if you are interested in your hair. I give treatments all over the United States by mail. Write me at once. I send booklet concerning the care of the hair, and testimonials of those taking my treatments when two-cent stamp is enclosed. I do not have agents. I need a personal history of your hair and scalp and your physical condition.

All mail promptly answered when two-cent stamp is enclosed. I am the only woman of the race growing hair today who can show the public the real length my hair was when I first began treating it. Send for booklet if you mean business. You can secure these preparations only from me. None like them made in the world. The T. D. P. Scientific Scalp Preparation, Madame Perkins, sole agent.

Dear Madam: I received the goods all right, which I presume you know by this time. I thought I'd want to see how I liked your treatment before writing. I also received your letter from Pueblo, and thank you very much for interest shown. Now as to your treatment, I used the red shampoo, and eggs. As I thought the scalp must have thorough cleaning to start with, and you didn't designate which to use first, I must say, it was the most delightful shampoo I ever had. I felt like I had a new head, (laugh). Now, as to your salve, it is the nearest thing to perfection I have ever used, as a dressing, and I don't think you've exaggerated its merits.

**THE CROWN OF SUCCESS.**  
(From the Denver Statesman.)  
A year ago the first announcement was made of the wonderful success which Mrs. T. D. Perkins had made in the growth of her own hair, and it is her intention to give the benefit of her knowledge to the world at large. Being one of the best known women in this section of the country, already the news occasioned much comment, and many people who had known her for years, came to realize for the first time that the magnificent suit of hair she has now was the product of a very short time and that a bare three years ago she wore her hair in short curls, not braided and dressed as success now does. That success begets success, was evident from the start. Her classes in the care of the scalp and the growth and beautifying of the hair were filled at once. They grew in prodigious bounds and some weeks ago she was compelled to abandon her out-of-town classes altogether. She confines herself now to treatments at her home in the Highlands and
