Metcalf Smashes Marks
Ralph Metcalf, sprint sensation at Marquette, has started on his career as a shorter dash record breaker. In his last two meets the big tier has tied the world's mark at 60 yards and last week broke the ten-year-old mark. Last summer Metcalf's chief weakness was his inability to start fast. He worked on his starting all winter until now his most ardent booster, Grantland Rice, says that he will be invincible this summer, and Rice doesn't speak many idle words. Its past history, but the greatest sports story of the year was Rice's story of the two short dashes in the Olympics. He still thinks Metcalf won one of those races.

Trotters Beat Jewish Community Center

The famous Globe Trotters took the Jewish Community Center into camp on the Center floor Sunday afternoon 30 to 19. The Trotters surprised everybody by turning in the closest guarding they have ever shown here and kept up a steady fire of shots at the basket to pull away from the Jews in the last quarter, ending with a game of their own, the fifth man refereeing while the other four fought for the ball, with the Jews and the spectators looking on. Up until Sunday day's guarding of the Trotters has been just about as they needed it to be, home to fight, according to the situation. However, for some reason the boys didn't want the Jews to get many points and but for seven free throws their score might have been lower.

Big Five, divided to fight

The Big Five, divided to fight and the youth, went up to Radcliffe Tuesday night and ran their victories to 29, turning the Radcliffe Roamers all back again.

REDUCING VETERANS BENEFITS

Undoubtedly Congress is going to give President Roosevelt authority to reduce veterans compensation and eliminate those drawing money for disabilities not connected with war service.

The Bystander has stated on many occasions that many veterans are drawing compensation from the government wrongfully.

The idea of compensation and allowances from the government is based upon incapacity of veterans who have served their country to make ends meet.

IN A POSITION TO ACT

The Roosevelt administration seems to be coming through the banking crisis. The people have been inspired by decisive action and are congratulating the president for it.

And like the drowning man who had the opportunity to learn to swim before the accident, we are not so sure that as governor of New York where most of the trouble started, much abuse was carried on under his nose and nothing was done about it.

Now that the legislature and executive branches are in accord it looks as if some results will follow. At least there is the opportunity. The new deal seems to be working.

THE SCHOOL ELECTION

The present administration of the school board was upheld in the election on Monday. It was entitled to the vote of confidence, the results of which left no doubt in the minds of anyone.

Passing up the undisputed fact that Des Moines has developed a splendid school system, the Bystander has been particularly interested in what the Negro's part is in the set up. We have urged that the place where Negro boys and girls are trained ought to be the first place to give them an opportunity to put that training into practice.

HEALTH TALKS

Dr. H. H. London

There are all degrees of muscle soreness from mild soreness on movement only, to severe soreness on movement, or a soreness that exists regardless of movement, or a muscle soreness that is equivalent to actual pain and which may be so considered.

That which comes from extreme muscular exertion to which one is unaccustomed is familiar to everyone and lasts for a few days only and may be so troublesome during that time that it causes concern as to its origin. Indeed it is quite possible for one to suffer from pain from other causes where recovering from the results of unaccustomed extreme muscular exercise.

The muscles of the back are most often affected from what seems to be over-use of these muscles while other muscles which have been used at the same time and to the same extent evince no soreness whatsoever. Over-stretching does sometimes occur in these muscles of the back and does sometimes cause a disability lasting a week or more.

Chronic muscle soreness is indeed usually due to tooth infection and usually disappears when these are remedied. Muscle soreness from other causes arises frequently but can be determined by painstaking and thorough examination only.

Beauty Hints

By "Bebe" Nothing is finer for generally toning up the muscles of the face than salt water. Keep a bottle of salt water solution in a cold place and dash it on the face daily after the usual cleaning process. It takes away that soft, flabby appearance and gives a firm look of youth to the face.

PALMIST WRITES OF THE STARS
By Luther Browne

Many years ago when I look up the study of Palmistry, Astrology and Psychology, I had a hunch of its depth or to where it would lead, I did not know that in years to come that I would be called upon in earnest by people of every race, class and distinction. Dame Fortune is certainly a fickle fairy, who dispenses her good and bad gifts with an erratic hand, after many years of experience I have come to the conclusion that the person in the greatest need of help and advice is the child who has just made his advent upon this earth.

Each human being has in his own circle or orbit in which he moves from birth to death, it seems rational to suppose that every individual is subject to the influence of some particular planet which was in the ascendant at the time of his or her birth and that a knowledge of the planet may help decide the ultimate career and fortune of the child.

I will go farther and say that the planet of a child may affect the future of the parents and that there is a mysterious relation between the parent and their offspring. The orbits of the parents are often entirely changed by the coming of a child. It is not a rare occurrence to have the influence of the child completely overpower the lives of the parents—we all are acquainted with folks who date their good, or bad fortune from the birth of a particular child.

People who have been respected and prosperous seem suddenly hounded by misfortune after the birth of a son and end in poverty. On the other hand many a family can date its good fortune from the day a son or daughter was born to them. Every child born is subject to the planet or star under which it came to life, when a child is born its mind is still a blank and its character unformed.

The stars find a ready tablet on which to record their marks for good or evil, and the character, disposition, passions, gifts, talents, etc., which the child will show in later years are decided on through the influence of the heavenly bodies. Thus the planet

Mercury gives wisdom and the force of mind; Venus gives the power of loving; Mars the desire to work and fight. Children born in March are usually sensitive and critical, inclined to keep to themselves, they have inventive genius and a keen analytical mind. They are good in mathematics, music and worthy of positions of trust hence many politicians of both sexes come out of this sign.

Questions sent to this paper will be answered free in this column. Private matters must be mailed directly to Prof. L. H. Browne, S. W. 21st and Watrous Ave., Des Moines, Iowa.

It's play for this little girl to "call the doctor" for her "sick" doll with her toy telephone—but it wasn't play for her mother when it was the girl that swallowed some poison—Mother doesn't dare to think what might have happened if she had not had the telephone to get the doctor at once.
