Rules School Must Distribute Negro Pupils

N.J. Supreme Court In Sweeping Decision

Trenton, N.J.—The New Jersey Supreme Court ruled Monday that communities must try for maximum dispersal of Negroes throughout their school systems and not merely to reduce imbalance in schools that are nearly all Negro.

The precedent-setting decision rejected the Plainfield School Board's plan for converting its 96 per cent Negro Washington School into a central sixth-grade school for the entire city.

The court said the proposal does not go far enough, for it does nothing about five other schools with Negro enrollments of 57 to 69 per cent Negroes.

The court, in a 5-2 decision, said State Education Commissioner Frederick Raubinger must reconsider the case in light of the standards set in the ruling. Raubinger had approved the Plainfield School Board action, but the court said he took too narrow a view of his powers and duties.

Raubinger set a nationwide precedent in 1963 when he ordered the City of Orange to end racial imbalance in a school that was 98 per cent Negro.

Raubinger said that even though the racial imbalance resulted unintentionally from a combination of housing patterns and neighborhood school assignments, it had to be ended.

Criticizes Negro Newspapers In Treatment of Crime News

Louisville, Ky.—Louisville Newspaper executive Norman Isaacs today criticized some Negro newspapers for maintaining two standards . . . one for themselves . . . and another for the daily press.

Isaacs said the Negro press has "one standard for the handling of prime news by the daily general newspapers and still another for itself."

Offense

"The average publisher and editor of a Negro newspaper," continued Isaacs, "would be deeply offended if the daily newspaper of his city placed great emphasis on crimes committed by Negroes."

"If I understand correctly the desires of the Negro citizen, it was that his daily local newspaper treat crime news for what it was worth, no more, no less and that racial identification, should not be used unless it was pertinent to the story," he said.

Isaacs' remarks came before the 25th Anniversary Convention of the National Newspaper Publishers Association meeting at the Sheraton Hotel through Saturday.

Competing

The NNPA represents publishers of Negro newspaper throughout the United States. Frank L. Stanley, Sr., publisher of the Louisville Defender, is president of the organization.

Isaacs, Vice President and Executive Editor of the Louisville Courier Journal and Times, said "American newspapers are taking a major interest in Negro youths for training in journalism."

As a result, Negro newspapers will be forced to compete with the larger dailies for competent manpower.

Challenge

He said Negro newspapers must meet this challenge with better wages and higher journalistic standards of they are to attract young journalism graduates.

Nat King Cole's Last Movie Highlights His Vast Talent

New York—Giving of the enormous talent that was his—acting and singing, is perhaps the way Nat King Cole would want movie goers throughout the world to remember him, and talent comes forth in his starring role in Columbia Pictures' "Cat Ballou".

Nat King Cole was one of the foremost entertainers in show business, and was extending his deep interest in a straight acting career before the cameras when he accepted Producer Harold Hecht's offer to portray "The Shouter", a picturesque character of the western wide-open spaces of the 'nineties in "Cat Ballou".

In the hilarious comedy, which is emerging as the biggest comedy in the history of Columbia Pictures, Cole and Kaye recount in song and words the ballad of Cat Ballou. Cat is Jane Fonda, a school teacher turned leader of an all-male band of outlaws.

Cole's acting-singing starring assignment is a highlight of the sensational Western spoof, produced by Hecht, and directed by Elliot Silverstein.

Trainees receive room, board and clothing, \$30 a month pocket money and \$50 a month which is placed in a savings account. Savings can be withdrawn at the end of the one to two years' training. There also is a provision for payment of up to \$50 a month for dependents.

Birmingham—The National Association for the Advancement of Colored People launched a state-wide summer voter registration project here Monday, June 21, with a goal of 100,000 more registered Negro voters by Aug. 27, when the drive ends.

One hundred volunteers officially began the campaign by attending a two-day orientation workshop. The workers included NAACP leaders could not take a public position on school Superintendent Benjamin C. Willis.

About 300 demonstrators reacted to a call from Albert A. Raby, convener of the Coordinating Council of Community Organizations, to put themselves into "an arrest situation" after the meeting with Daley.

Police broke up the demonstration after about 20 minutes, and more than 200 protesters moved to the nearby Board of Education building for a rally.

A Bang-up Cake for the Fourth

FOR AN INFORMAL PARTY after the Fourth of July fireworks serve this unusual Firecracker Cake. The cake roll itself is a delicate angel food made from premium cake flour. Lusciously filled with chocolate ice cream, it is gaily decorated for the occasion in red and pink.

FIRECRACKER ICE CREAM CAKE

1 cup sifted Swans Down Cake Flour
1 cup sifted granulated sugar
1 cup egg whites (8 to 10)
1/2 teaspoon salt
1 teaspoon cream of tartar
1 teaspoon vanilla
1/2 teaspoon almond extract
1 quart chocolate ice cream
Pink Peppermint Glaze
Colored ornamental sugar or tiny red candies
Few long strands of coconut

Sift flour once, measure, add 1/2 cup of the sugar, and sift together four times. Place egg whites in large mixing bowl; add salt, cream of tartar, and flavorings. Beat with flat wire whip or egg beater until egg whites are stiff enough to hold up in soft peaks, but are still moist and glossy. Add remaining 1/2 cup of the sugar in three additions, sprinkling 2 tablespoons at a time over egg whites and beating 25 strokes or turns each time.

Add flour-sugar mixture in two additions, sifting it over the egg whites. Fold in each addition with flat wire whip or large spoon, turning bowl gradually. Use 15 complete fold-over strokes each time. After last addition, use 10 to 20 extra strokes.

Spread batter in a 15 1/2 x 10 1/2 x 1-inch pan which has been lined on bottom with paper. Bake in moderate oven (350°F.) 20 to 25 minutes, or until cake springs back when pressed lightly with fingers.

Cool 10 minutes. Then turn out on cloth covered with powdered sugar, remove paper, and trim off edges. Roll up, rolling cloth in cake. Cool thoroughly (at least 1 hour).

When cool, unroll, removing cloth. Spread with chocolate ice cream. Roll up again and freeze in home freezer or freezing compartment of refrigerator (0°F.) at least overnight or longer, if desired. Then frost with Pink Peppermint Glaze and sprinkle the colored sugar in diagonal lines across top of cake. Insert a few long strands of coconut at one end of roll to resemble a wick. Freeze at least 2 hours longer. Then slice and serve at once. Makes 8 to 10 servings.

Another weekend holiday approaches and law enforcement officers are girding for the traffic hazards and activities in the several days ahead as Americans hit the road in a big way. However, the weekends between holidays and not the holidays have proven to be the bane of Iowans and those who are driving through. Whatever you do and wherever you go for the July 4th weekend, have fun, relax and drive carefully, won't you?

You can't help but notice that Des Moines is losing a lot of its qualified and talented persons this summer. First there was the announcement that Mrs. Helen Stevens Humphrey, director of Willkie House, was leaving the city. During her short years here she has left an imprint on the community and won the respect of most as so few do in so brief a time.

Almost simultaneously came the announcement that Dr. Eddie V. Easley, professor at Drake and president of the Willkie House board of directors this year, will leave to join the faculty of the University of Wisconsin next fall.

Another couple who are leaving because the head of the house is being transferred is Mr. and Mrs. George W. Jackson of 3101 Ambert street. They have lived in Des Moines 18 years and came here from Waterloo, and before that was in Ottumwa.

Mrs. Jackson who has been employed as supervisor at the Polk County Juvenile home, called us earlier this week to let us know of their plans for departing the city, later this week, for their new home in Milwaukee, Wis.

Their two sons, Terrance Jackson who lives with his wife in Milwaukee, is studying for his master's degree and also spending the summer in charge of all the arts and crafts for Milwaukee schools. Their youngest son, Dennis, left Des Moines recently to return to Milwaukee and enroll for his sophomore year at the University of Wisconsin. Both sons are graduates of North High.

Mrs. Jackson, who expressed regret at never meeting yours truly personally although she had several phone conversations with us occasionally, said she had worked up to the last minute before leaving because no replacement had been found at the Polk County Juvenile home. She will be working in the same field when she arrives in Milwaukee.

NEXT MONDAY IS A HOLIDAY

For those who have supported the Goode park swimming lessons program and for those who have enrolled their children in an attempt to help the program along this year—the following is not for you.

The news is that unless there is

an appreciable increase, some 300 or more, the program will be discontinued at Goode's. This is the news from Cecil Brewton, who has served as supervisor of the Goode Park swimming lessons program for some 20 years now.

Needless to say, it will be a shame if the program is discontinued at Goode's which boasts the best swimming pool for lessons, because it has the best shallow end. Goode's pool is 2 1/2 feet in the shallow end, which gives youngsters, six and seven years old a lot of confidence. Other pools have regulation depths of three feet, which is required in pools for swimming.

If the Goode pool lesson program is given up it will mean that youngsters who earnestly want to learn will have to travel some distances to other pools around the city.

Besides being a wonderful recreation and exercise swimming is educational as well and may be instrumental in saving a swimmer's own life or that of a companion. People are taking more to water sports. Water skiing and boating are on the increase each year. When our youngsters grow up a boat will be part of some families material possessions more than likely. Or perhaps while at school they will be invited to a weekend of water sports or a seaside or lake vacation. A good schooling in swimming and all its side elements will be essential.

The Goode park swimming program like all other pool programs, has been other the Red Cross supervision and has always had an integrated staff. There are enough youngsters around to more than fill the classes and thus justify the supervisor's and teachers time. This year there are less than 200 children in the program and there are only three classes instead of the usual four. Some classes have less than half their capacity. Last year the program had only about 300 youngsters. The minimum goal is about 500 to 600.

The programs are well supervised and there is strict adherence to rules and regulations. If you are wondering about the program and have a youngster you would like to enter, but a little hesitant, drop over some morning on Monday, Tuesday or Thursday and observe for yourself. Seeing for yourself is your best information forte.

GOLDWATER FORCES
RAISE THEIR HEADS

Many people felt that Senator Goldwater almost wrecked the Republican party last year. At least, not only was he defeated, but also he carried to defeat a lot of fine candidates. And not satisfied with that escapade, he has organized a new group which he claims will help the party.

This country gets along pretty well with two strong parties. Efforts have been made in the past to form splinter parties, generally organized by some fellow who can't have his way entirely in the party in which he had worked.

Moderate forces must not sit idly by and allow Goldwater and his followers to carry the party to ruin. They must begin now to see that such movements of whatever form are nipped in the bud.

And even though fattered by a strong leader, splinter parties have died with time. Since the turn of the century, there were the Bull Moose party by Theodore Roosevelt, a Republican; the Progressive party by Henry Wallace, a former Republican and later a Democrat; the Progressive party by Senator Robert La Follette, a former Republican; the Dixiecrat by Strom Thurman, a Democrat. All of these were able men but got nowhere with their adventure.

Senator Goldwater's group will meet the same fate. As a matter of fact, they are a disgruntled bunch daring to ruin rather than to help. This movement comes at a most unfortunate time in that it will confuse a lot of people as more level headed citizens are trying to rebuild the Republican party.

National Chairman Bliss has expressed dissatisfaction that such an organization should be started. He is right. It must be tagged for what it is; a rule or ruin group which does no good for the Republican party or the country as a whole.

TAXING BODIES SHOULD
HOLD THE LINE

The taxing bodies of Polk County hired a professional appraisal firm to make an appraisal of real estate for taxing purposes beginning with the 1965 taxes payable in 1966.

Following protest by many citizens, the assessors made several adjustments, mostly downward, but the public does not know what their taxes will be.

The board of review offered tax payers a further opportunity to make objection to the new assessment. It has been a difficult job for more people than ever have protested their assessments.

Each year taxes have moved up. It has always been difficult to understand why, in view of the large amount of building that has been constructed during the past few years, taxes continue to rise.

Some members of the board of review suggested that those who protested their high taxes should appear before the taxing bodies and urge that they hold the line and take on no new projects which will boost the tax levy.

With this, most people will agree. Taxpayers money should be spent frugally and not simply because they have the authority.

WONDERS AT
MISSISSIPPI UNIVERSITY

Wonders will never cease for judging from the commotion which was raised just a few months ago over integration at the University of Mississippi, one would think they wanted no Negroes other than service and maintenance people on the campus.

The board of governors announced recently that a Negro teacher had been employed to teach biology. (Incidentally, she received her doctorate at Ames.)

This is progress and shows that the fight against segregation is showing some favorable signs of success even in Mississippi.

We were interested in an article on tennis that appeared in the daily paper last week. The writer was indeed correct when he said that tennis requires top condition. It is one game where one may play for from one-half hour to three hours with no time outs or rest periods. Baseball gives just about every player a chance to relax and check their mistakes. The pitcher and catcher probably have the least time of all but they can call time out. Football players have a lot of time between plays and they can call time out periods as well as the half time breaks.

Run and Run

But in tennis you run and then run some more under a blazing sun and there is no letup except what time one can gain by walking back and forth between serves and court changes. Even then you don't stop except maybe for a drink. There isn't any physical contact in tennis. If there were one could never take it.

The nearest thing we ever saw to tennis action was an English football game one day. Those chaps ran at full speed for 45 minutes with no sort of a break. They rested about 10 minutes and went back and ran like scared rabbits for another 45 minutes.

Condition

That requires condition and stamina that one finds in tennis. While Mr. Housh was mentioning tennis players who played other sports he might have mentioned Gary Fletcher of Iowa who mixed football and tennis. Then, also, Harris Coggeshall was quite a soccer player.

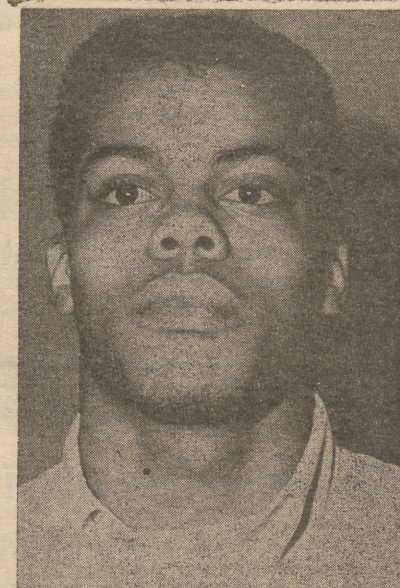

Of course, most of the fellows who played around here played some other sport. We recall one fellow in his late thirties who sometimes played a tennis match in the early evening and then went out to catch a soft ball game. This after working all day.

The kids that we see play the game as a pastime. We nor anyone else could never get it through to any of the would-be players that tournament tennis is a way of life and one must live it if one would play it well.

But we failed to put that idea into the heads of our pupils so they wanted to do just that. They got into some meets because they were handy and didn't drill for them preferring to be able to beat each other. We don't know just how we could have done it, but we would like to have those tennis classes again. They might come down to just one or two pupils because we would be striving to get our idea of tournament play into the heads of those who wanted to play and those who didn't, we would drop.

Track

Well, Clyde Duncan, didn't make the American team to Russia, but he might realize that he was traveling in very fast company. However,

DUNCAN

he still has a while to go yet for his Olympic goal and with hard work and a few breaks could make it. But do you know a guy told us that good breaks nearly always go into hard work. We agree sometimes.

HEALTH FOR ALL

BLOCK THOSE FUMES

Looking around for something to feel optimistic about? Then the state of air pollution control—or its future anyway—invites your gaze.

Amid the foggy foggy dew of debate on this often murky matter, a ray of light has shown through. It isn't bright or warming enough to clear up the whole atmosphere. But it does illuminate the possible shape of things to come.

Phase

It happened during recent hearings on a phase of the air pollution problem that has bothered a lot of people: the role that auto exhaust fumes are said to play in messing up our national ozone. The car makers, while doubting that exhaust fumes are at all responsible, allowed that something could be done about the problem. As the New York Times put it, "the industry, for the first time, offered a time-table . . . This underscores the fact that the auto makers have designed themselves to the idea that exhaust controls are inevitable."

Repeating

Thus history repeats itself—and sometimes endorses its best performances. Not long ago the horseless carriage designers were having fingers pointed at them for allegedly neglecting safety devices. After tak-

ing it on the bumper for years, they produced a whole range of anti-accident gimmicks. And everybody was happier, including the carmakers.

Controls

Now the car industry is receptive to the idea of equipping all new cars with controls for exhaust fumes and crankcase contaminants, such as are already required by the State of California beginning with 1966 models. All the car makers want is a little time—say a couple of years. Meanwhile, there are still a few other phases of the problem to be worked on—like industrial fuel wastes, trash burning, home furnaces, tobacco smoke . . . Want to take a hand? The National Tuberculosis Association has a free leaflet called, "Air Pollution, The Facts", which tells you what you can do. Be The Best of
Whatever You Are

If you can't be a pine on the top of the hill,
Be a scrub in the valley—but be
The best little scrub by the side of the hill;
Be a bush if you can't be a tree.
If you can't be a bush be a bit of

the grass,
And some highway happier make;
If you can't be a muskie then just be a bass—
But the liveliest bass in the lake!
We can't all be captains, we've got to be crew,
There's something for all of us here.
There's big work to do and there's

lesser to do,
And the task you must do is the near.
If you can't be a highway then just be a trail,
If you can't be the sun, be a star;
It isn't by size that you win or you fail—
Be the best of whatever you are!

British Fighter

Says He'll Wait

Turn For Ali

Birmingham, Eng.—British and Empire heavyweight champion Henry Cooper figured today that Cassius Clay was the man he would next like to fight, but "I guess I'll have to wait and see what happens in the next few months".

Cooper, although disappointing at times because of frequent mistiming, demolished challenger Johnny Prescott with a TKO after the 10th round Thursday night in his sixth defense of the British and Empire titles.

"There's not much left for me now . . . nothing worthwhile that is . . . venging a crack at Cassius," Cooper said after his victory.

But he agreed that Floyd Patterson and Canadian George Chuvalo rated priority for Clay's world title.

"I guess I'll have to wait and see what happens in the next few months," he said.
