Monthly Meeting

1995 Farm Bill- Implications for Fish & Wildlife by Jim Pease Thursday, January 19, 7:30 PM, Room 2532, Veterinary Medicine Building, Iowa State University, Ames

Jim Pease, Extension Wildlife Biologist and Assistant Professor of Animal Ecology at I.S.U. will present an overview of the 1985 and 1990 Farm Bills and the changes they brought to Iowa agriculture. He will also examine the Conservation Reserve Program and what it has done to benefit Iowa's wildlife. And, perhaps most importantly, what will the future be for wildlife in the next Farm Bill?

# **Future Events**

February 16, Meeting: Natural Areas of Ames by Bill Norris March 16, Meeting: California Desert by Wolfgang Oesterreich April 20, Meeting: Wildlife Diversity Program by Bruce Ehresman

May 18, Meeting: Entomology by Ken Holscher

(Meetings are held in Room 2532 of the Veterinary Medicine Building, I.S.U.)

#### **BIG BLUESTEM AUDUBON SOCIETY- BOARD MEMBERS**

#### Ames Bird Count Results

Results from the Ames Count, held on December 17, 1994 are printed to the left. It was a good count and a mild day. Thanks go to all those who participated in the field or at feeders. Thanks also to Dave Edwards for compiling the count and to Dave & Jeanne Edwards for hosting the after count chili supper.

## Annual I.O.U./D.N.R. Bird Feeder Survey

Printed on the third and back page of this newsletter is the 1995 Winter Bird Feeder Survey. We print this survey as a service to our members who want to participate and as a favor to our friends in the Iowa Ornithologists Union and the Wildlife Diversity Program of the Iowa Department of Natural Resources. The survey takes place January 27-30, 1995. Please follow the instructions on the back page and mail the completed form by February 12 to the address listed on the form.

Results from last year's survey show that 14 species had significant increases while only 3 significantly decreased. Mourning Dove, Robin, Goldfinch, House Sparrow and House Finch had ten year highs. Tree Sparrows decreased reaching a ten year low. Dark-eyed Juncos, House Sparrows, Black-capped Chickadees, Blue Jays and Cardinals were all seen by over eighty percent of the participants. Goldfinches and Downy Woodpeckers were seen by over seventy percent of the participants. Participation in the survey was lower last year so mark your calendar and don't forget to join in this year!

#### Note of Thanks for Audubon Adventures

This from Nancy Kurrle to BBAS members: "Thank you for your continued support of the Audubon Adventures series for the Ames classrooms. The series is pertinent and useful in supporting our science and environmental curriculum. Your financial support to just our district over the past nine years comes to over \$2000. That's a big investment in our youth for tomorrow's environment."

Stan Cyran of Ames has been chosen by the Board to fill a vacant Board slot. Welcome aboard Stan!

I would like to receive the free <a href="Nongame News">News</a>. (NEW SUBSCRIBERS ONLY) I would like information about the Iowa Ornithologists Union which is a statewide bird organization. If you see a rare or unusual bird, please report it to the Iowa birdline 319-338-9881.

## 1995 WINTER BIRD FEEDER SURVEY

# SPONSORED BY THE IOWA ORNITHOLOGIST'S UNION

## AND THE IOWA DEPARTMENT OF NATURAL RESOURCE'S NONGAME PROGRAM

On two consecutive days during January 26-30, 1995 observe your feeder and using this form, describe your feeder and record the birds that visited you. In the space provided, list the highest number of each species that you saw together at any one time. For example, if you saw 10 juncoes at 9:00, 11 at 12:00 and 7 at 4:00, the number you should record is 11. If males and females can be distinguished (cardinals, downy woodpecker etc.) record the combined total. For example, if you saw 3 male cardinals at 11:00 then 1 male and 2 females at 2:00, record 5 cardinals—the highest count for the males and the highest count for the females combined. Count only on the two consecutive days and record only the birds that you see at your feeder, under your feeder, or in the trees around your feeder. Do not count birds which just flew past your house and did not use your feeder area. We want information only about birds influenced by your feeders. If you cannot get an exact count, record your best estimate. An honest estimate is far more useful than 'umpteen' or 'too many to count.'

Mail the completed form to me by February 12, 1995:

R. J. Hollis 3351 Lower West Branch Road Iowa City, IA 52245

If you would like a personal reply, please send a stamped, self-addressed envelope and be patient; it may take 12 months before I can get back to you. Look for results in the Iowa Nongame News and the I.O.U. newsletter.
