

DEPT OF AGRICULTURE,  
G. W. CARVER, Director.

Tuskegee, Ala. 3 + 30 1897

Mrs L. H. Farnum,  
Iowa.

Dear friends—

Time and again have I set apart a time to read your letter, but something unforeseen always comes up, and this is a place where they are constantly appearing, and I can enjoy my work very much indeed, the weather is simply superb, and as for flowers I never saw anything like it. This is indeed a new world to Iowa, very poor to be sure but many things to make it pleasant. I like it so much better than I thought I would at first.

I sympathize with the little baby brother and also wish for the sisters as they of course must take a rest slightly in the near now, for a while at least. I wish I could tell you all the nice flowers we have in bloom now. We have accepted

ripe strawberries, plenty of lettuce radishes  
onions &c. & has varied almost  
necessantly this spring.

Our Faculty gave me entertainment  
last night, a farce in one act from the  
French, & think I have never seen  
anything rendered so exquisite, and  
the music was superb.

When I get very tired & wish I  
could run in and see Mr & Mrs. Pammel  
as of old, but I cannot. Of course

Tell Prof. Pamm. that I will send him  
the list of plants he asks for as soon as  
I have time to copy them off, as they are  
in a large book. Ask him to please send  
my lectures to me if Prof. Fish has returned  
them as I could use them here to good  
advantage. How he would enjoy this flora  
if he was here. I think of him every time  
I go out collecting. Well as some one is  
coming to batter me & march class for

this time. It is one of the orators do  
me to drift, Good bye, Love to all, Please  
tell Mr. & Mrs. Pammel to write to me. I shall be  
back again. Geo. W. Currier.
