Geo. W. Carver,  
DIRECTOR DEPT OF AGRICULTURE  
AND EXPERIMENT STATION.

TUSKEGEE, ALA., 6-5-1897

my dear Prof Pammel

Your esteemed favor of May 29<sup>th</sup> at hand and contents duly noted, & hope you will pardon me for giving you so much trouble concerning my paper for the Acad. of Science,

& fear I could not get up a paper worthy of presentation on puff balls, this year as I have only a very limited number in my collection and have given them but little thought since I came. Again here they do not appear until quite late in the fall, making it quite late to collect and identify.

I am making a specialty of the Cercospora have a set nearly ready to send you, nearly or quite all are named by good authorities, and will add more to the list. I should like to take the Cer. of Macou Co. if you will help me with it, I have never been anywhere or any place where Cer. were so abundant. (over)

I assume you appreciate your efforts  
to help me, but this is not new, or  
unusual to me, as during the 6 years  
I was privileged to be under your  
tutorship and at times when I know  
it must have cost you much to do it.

It does me a great deal of good as I  
read from time to time clippings of your  
success.

My microscope is doing good  
service.

enclosed please find a little note book  
which accidentally gotten into my collection  
I judge it is one of Dr. Perry's.

I wish to be remembered to Mrs. Samuel  
and the children.

Yours much truly

Geo. W. Carter.
