

College History

April 3, 1925

Prof. G. W. Carver,  
Tuskegee Institute,  
Tuskegee, Ala.

Dear Prof. Carver:

I have your letter of March 29th and am glad to hear from you.

I have occasionally found *Sclerotinia Fructigena* on the plum. That is, I found some a few years ago. I may have been with some Plant Pathologist who showed it to me, but I remember distinctly seeing it on the plum. I feel quite sure that I did not see any while you were a student at Ames. How abundant the perfect fruiting form is in Iowa I am unable to tell you, but I am asking Dr. Melhus to reply to you direct.

I am always glad to hear from you.

I suppose that the material you found in the laboratory at Cornell must have been sent to Prof. Atkinson. We have a lot of your material in the college and much of your material has been used in connection with lists of fungi.

Yours truly,
