Call. Smith

Prof. G. W. Carver,
Tuskegee Normal and Industrial Institute,
Tuskegee Institute, Alabama.

Dear Prof. Carver:

I am interested in your letter of April 10th, especially regarding the hybrid amaryllis. Mr. Riorden here at Ames has a fine lot of these.

I had hoped to send to you by this time, a copy of the Ames paper in which I referred to your splendid work. I will send you a copy. Possibly I could get a number of your students down there to help out with the publication of a special number of 10 or 12 pages about your work. Then I would extend and change the material.

Yours truly,

P/H
