COLORED YOUNG MEN AND WOMEN

GEORGE W. CARVER

DEPARTMENT OF RESEARCH AND EXPERIMENT STATION

TUSKEGEE INSTITUTE, ALA.

3-29-24.

My dear Dr. Tammel; -

I am wondering if you have ever been able to find "Sclerotinia Fructigena", (matured form) on either the peach or the plum?

I was in Prof. E. F. Guba's Class at Cornell, and he showed me quite a number of fine specimens, some seemed to have as many as 30 well developed Apothecia.

Prof. Guba said that they were not at all uncommon there, I have as yet not succeeded in finding 'em here.

I had the pleasure of speaking to his class in Pathology. He showed me a number of specimens, that I collected while under you at Ames. They remembered you very well, and talked quite freely of your splendid work.

Prof. Guba seems to be especially interested in *pestalozzia*  
I am going to collect, and send him some.

With kindest regards to your self and family,

I am always greatly ally yours,

Geo. W. Carver.
