

May 20th, 1935.

Malcolm McDonald
Department of Biology
Parson's College
Fairfield, Iowa.

Dear Mr. McDonald:

I am most appreciative of your letter containing the observations which you made of the Starling in Jefferson County during December, 1930. I will be very glad to make a note of this earlier date when the completed list of these first occurrence records is run off.

I should think that the information which you sent me, if sufficiently boiled down, would form good material for a note in Iowa Bird Life. In other words, publish this early account. I do not have any such information on hand at the moment otherwise I might ask permission to prepare the note. Why don't you work it up and send it to Fred Pierce, Winthrop, Iowa.

Very truly yours,

Philip A. DuMont
