

August 6, 1932.

Gustav Swanson,  
Zoology Department,  
University of Minnesota,  
Minneapolis, Minnesota.

Dear Mr. Swanson:

I have talked over with Dr. Drake the matter of bringing you to Ames for an interview relative to your possible appointment as my assistant.

Dr. Drake seems very much interested and there seems little question that, other things being all right, something satisfactory can be worked out both from a standpoint of yourself and the College.

I shall hope then to see you Monday morning, September 12, at the University and we can then decide upon our immediate plans. Possibly it would be more convenient if I could meet you then Monday morning at Breckenridge's office.

Yours sincerely,

Paul L. Errington,  
Assistant Professor,  
Wild Life Research.
