Dear Sir:

I understand that Professor W. F. Kubichek of Coe College, Cedar Rapids, Iowa and formerly of the United States Biological Survey, has submitted for publication a paper on "Food Habits of Five Species of Deep Water Ducks" to W. L. McAtee, Division of Food Habits Research. I suppose that this will get to your office eventually, if it has not already.

In case this is to be published within the near future I would appreciate it if you would let me know. Our Department here at Iowa State College is carrying on some waterfowl investigations and this material on deep water ducks would be of tremendous value to us.

Very truly yours,

PLE\*B
