Mr. W. L. McAtee,  
Division of Food Habits Research,  
U. S. Biological Survey,  
Washington, D. C.

Dear Mr. McAtee:

I am sending for criticism carbon copies of two recent papers by Bennett and myself.

One, "Mid-West Duck Breeding Grounds", is intended for American Game. The introduction is weak and will have to be revised. I would appreciate your opinion as to whether I draw conclusions not substantiated by the data presented.

The other, "Lost Legions", was written for Field and Stream. Do you see any possibility of kick-backs in this? Especially, as concerns my treatment of hunting practices?

The fox stomach analyses arrived o.k. I wish to thank you very much for your consideration in getting these done.

Very truly yours,

PLE\*B

Paul L. Errington,  
Asst. Prof. Wild Life
