Mr. W. L. McAtee,  
Division of Food Habits Research,  
U. S. Biological Survey,  
Washington, D. C.

Dear Mr. McAtee:

Do you happen to be familiar with the U. S. Biological Survey film entitled, "Our Wild Life Resources?" If so, would you mind giving me an idea as to its nature and your opinion as to whether it would be worth our while to obtain it in case we wish to show some pictures before an extension meeting or large gathering of this sort? I would just like some kind of idea as to what it is before we go to the trouble and expense of having it sent here for screening. Thanks!

Very truly yours,

PLE\*B

Paul L. Errington,  
Asst. Prof. Wild  
Life Research
