Dr. Paul L. Errington  
Iowa State College  
Ames, Iowa

Dear Paul:

I am much heartened by the prospect that the Dean and the Commission are to have a further and amicable conference and that there is a chance of a joint set-up with the Biological Survey. This sounds like a more tenable arrangement. Please keep me posted.

I also wish that you would express to Dean Buchanan my own personal appreciation of his interest in the wild life work. I realize more and more how exceptional it is for administrative officers to understand and appreciate what we are driving at.

I am writing this letter before I have had a chance to read over your revised vulnerability paper for American Forests, but I will get through it within the next couple of days and write you further.

Yours sincerely,

Aldo

P.S. I have gone over the paper and consider it much better than the previous one. Attached is my letter to Butler.

A.L.
