

SMITHSONIAN INSTITUTION
UNITED STATES NATIONAL MUSEUM
WASHINGTON, D. C.

Mr. Errington

January 16, 1935.

Mr. Aldo Leopold,
In Charge, Game Research,
Department of Agricultural Economics,
University of Wisconsin,
Madison, Wisconsin.

Dear Mr. Leopold:

I have your letter of January 11 regarding
Errington's manuscript on pheasants and quail.

I may say that fortunately I am not the
editor of the AUK and Dr. Stone is the party to whom you
should write. The fact that the paper was presented at a
meeting of the Wilson Club would in no way invalidate it
as material for the AUK. I hope that you may be able to
place it there although I understand that the AUK is at least
a year and possibly more behind in publication.

If you desire prompter publication, I do
not know just what the status of the WILSON BULLETIN is although
I think it is a little bit faster. Another journal that may be
available is the AMERICAN MIDLAND NATURALIST which publishes
longer papers than either the AUK or the WILSON BULLETIN. It
might be worth a try. With best regards,

Sincerely yours,

Herbert Friedmann

HERBERT FRIEDMANN,
Curator, Division of Birds.
