

Oct 31

Dear Paul -

I appreciate your attempt to do something about Castro. I would not in any case acquiesce in your paying anything personally.

I have decided encouragement from a Baraboo group who considering subscribing a fellowship which could incidentally carry Castro, or else provide a student who could census the quail. My suggestion is that since you have been supervising Castro, you ask him, if he cares to take the gamble, to go ahead with at least the minimum amount of work and I will do my best to find a way of paying him later.

In your opinion is the \$200 an irreducible minimum for reliable results?

Glad to get the Marshhawk reprint. Had a nice visit with Fredrick and Fran recently.

Yours

Alde

P.S. My love to Carolyn.
