Mafeking, Manitoba
Canada

Dear Mr. Butler:

I was interested in your muskrat paper in the March Canadian Field-Naturalist, particularly in your attempt to measure the yield of wild foods. Very few investigators have gotten this far, and even though your measurement was crude, the attempt is notable.

If by any chance you have reprints of the paper, I would appreciate receiving one. I know that Errington would also appreciate a reprint if they are available.

Sincerely yours,

Aldo Leopold
Professor of Wildlife Management
