

April 13

Dear Paul -

I've been working for 2 weeks on the Prairie du Sac MSS and hope to have a rough draft in your hands by May 1.

I have Zinsbauer's notes and will feed them with the MSS. As often before, the March count (174) dropped by April 1 (to 158), loss of 50%.

Albert hasn't gathered his pellets yet - snow went off late. Horned Larks aren't nesting, but there are plenty of rabbits. Puzzle?

Your new lead on quail sounds interesting. Love to Tardieu

Yours

Aldo
