Dr. Paul Errington  
Iowa State College  
Ames, Iowa

Dear Paul:

I mentioned to you some months ago that Jim Beer, who has started work on muskrats here, would like to come over to get the benefit of your coaching and instruction.

Jim is taking summer courses and hence has only week ends open from Friday to Monday. Could you take him on for some week end after mid-July when you expect to be doing muskrat work yourself? I realize that you may not want to commit yourself to a time very far in advance since I know that this sometimes works out awkwardly. Any arrangement you suggest will be agreeable to us.

Jim has accomplished a surprising amount of field work on University Bay and Lake Wingra during the present summer. I think you will find him very absorptive of your kind of muskrat dope.

With personal regards, yours as ever,

Aldo

Aldo Leopold

P.S. Are there more reprints of your Prairie du Sac paper? We have exhausted our supply and would still like additional copies if you could tell me if they are obtainable.

*Remembered in Longmont from  
Red Lodge, July 4; TGS asked to  
send AL a dozen copies of EM*
