424 UNIVERSITY FARM PLACE

Dr. Paul Errington
Department of Zoology and Entomology
Iowa State College
Ames, Iowa

Dear Paul:

It will take 25 copies to supply my library, my students and a few of the directly interested faculty members here. I could use from 25 on up to a hundred.

I will transmit your message to the family. I hope Carolyn is well and that you will give her my love.

The new lead on muskrat disease sounds very interesting. I hope it bears out.

The Ecological Society has asked me to organize a symposium on bird and mammal populations a year from now. I hope that Elton will be here at that time. You, of course, must be in on it and I would welcome your giving some advance thought to its organization.

With personal regards,

Aldo
(V.S.)

Aldo Leopold
(Signed in Mr. Leopold's absence to avoid delay).
