

March 21, 1947

Dr. Clarence Korstian
Botanical Editor, Ecology
Duke University
Durham, North Carolina

Dear Clarence:

I have received the following note from Paul Errington.

"I just received a letter from a man who is starting some ecological work in Brazil and who asked me to put him in touch with ecologists in this country who would care to exchange publications with him. He is evidently more interested in botanical than in animal ecology, so I thought that some of your papers having forestry or land use slants might be about what he would need.

His name and address:

Henrique P. Veloso
Instituto Oswaldo Cruz - Manguinhos
Caixa Postal 926
Rio de Janeiro, Brasil

I wonder if it might not be well to run a little notice in Ecology. Anybody who is doing any ecological work in South America should be encouraged."

If it is feasible for you to do so, I suggest the insertion in Ecology of an appropriate note about Mr. Veloso's wish to exchange publications.

I will send him as a starter my own plant phenology paper, now in press with you.

Sincerely,

AL:PM

ALDO LEOPOLD
