Dear Elizabeth:—

Had a pretty good trip
out. Felt a bit like the
Israelites but ~~were~~
no certainly that we
would fare as well.

Had sea mostly on one
side of the track. For the
Platte R. had evolved
into a lake and swirled
about in a very business
like manner. Carrying
bridges & trees in its
current. The water
was mostly below the
level of the track tho'

we did go thru' some
some of the small favour
looked a la Venice &
small boys went
about in impro-
vised gondolas guided
with oars or
denoted themselves to
making. They looked
infinitely more pleased
than the rest of the
citizens.

It's all high & dry
about here.

Dr. Petersen brought
me out this A.M. &
we looked over the field.
I'll have a fine labour
tany overlooking Long's Peak

The foothills are about ¹⁹²
4 mi distant.

This is a fine town
of 10,000 - very attractive.
The campus is right
in the city as much as
at La. City. On one
side but there is ample
room for expansion
at the other side.
toward the Mts. There
is a fine boulevard straight
out from the main St (College
Ave. to the College Gate.

I believe you may forward
my mail to 521 S. Meldrum Ave. ^{St.}
- letters I mean if you have time
I'll have my folks call for

Any papers they want
to read.

Its very hot just now.
They say the unusual
heat has been melting
the snow on the mts &
adding unduly to the
flood water which has
not been subsiding as
might be expected.

Hope you are farming
better, ~~over~~ Iowa.
The nights are just
cool.

Sincerely,

Ira Hayden
