

March 19. 1919.

Dr. R. E. Buchanan,
Campus,
Dear Dr. Buchanan:-

Dr. Ada Hayden calls my attention to the fact that something should be done in the way of supplying her with a desk. Two flat top desks were asked for in our budget, one for Dr. Hayden and one for Dr. Bakke. Miss. Hayden has been quite patient about this, but I think something should be done now to provide her with a desk. If we could get a desk to use temporarily, it would do for the present. It will, however, be absolutely necessary to provide Dr. Hayden with a desk for next year. We have always used some of the laboratory tables for office furniture, but it has become necessary to have these tables to use in laboratories.

I am enclosing herewith a copy of Dr. Hayden's letter.

Yours truly,

LHP/EMT.
