

Dr. L. H. Pammel,  
Ames, Iowa.

2712

Dear Dr. Pammel: — Your recent letter was received and I should have answered it more promptly, but I have been trying to find a few minutes to breathe in and have not succeeded so I will proceed anyway.

I appreciate your asking me to come back to the department at Ames. I am much interested in it. So far as the salary is concerned, I feel that I should be earning more than \$500 at this time. However, it is the kind of work I prefer. I care more about science than anything on earth and of course I should be in an environment favorable for growth along this line.

I have nothing definite in mind at present, tho' am hardly prepared to say, at present, what I shall do, but you may consider me as a possibility, if you please.

Sincerely,

Asa Hayden.
