June 8, 1910.

Miss Ada Hayden,

St. Louis, Missouri.

Dear Miss Hayden:-

Miss King told me a few weeks ago that you would be here about the 21st of June. I want to give you some employment this summer during July and August. During the month of July the graduate school of Agriculture will hold its sessions here and there are to be a number of noted botanists here.

I want to have a number of water color sketches made of a few plants. I would like to have you look up the lithograph plates in Brandt & Ratzeburg, Deutschland's phanerogamische Giftgewachse in Abbildungen u. Beschreibungen, Ed. 2, 300, 48 pls., Berlin 1838, of the following:- Datura stramonium, Rhus toxicodendron, and Cleome maculata, you will find this in Millspaugh.

I hope that you will get your degree and that everything will be finished in a satisfactory manner.

Yours truly,
