

Zoological Laboratory,  
University of Pa.  
Philadelphia.

Nov. 12, 1914.

Dear Miss Butler,

Your note of  
the 2nd, enclosing a copy of your  
paper from the "Canadian Entom-  
ologist" was very welcome, and  
I am glad to hear from you  
and to thank you for your  
paper. I had seen it for a  
few minutes at the Academy  
of Natural Sciences, but neither

there nor here have I had time to compare your descriptions with specimens to see whether I have anything like the new species which you describe.

Mrs. Calvert and I thank you for your good wishes for our past summer and for the kind message from your Mother. We did not go away from Philadelphia but enjoyed working here over some of our Costa Rican notes.

You say nothing of your

own possible return to Ithaca.  
If you go there, or come anywhere in the East, we hope that your Mother and you will give us the pleasure of seeing you again.

Yours very truly

Philip P. Calvert
