7 July

1913

Dear Miss Butler:

Came up here on the
2^d and have been writing hard ever since
Have temporarily exhausted the ink supply
Last thing I discovered before leaving
Ithaca was that I had not made
prints from our Odon negatives of
your drawings. I arranged with Mr.
Lloyd to make them for you at once.
Now you may expect to get them soon
I left 12 graduate students working
in my laboratory. Was too busy to write
down them. Miss Morgan is among them
She is working on the mayfly handbook
now, but will not get it done, as she has
but a short stay this summer. Our Odon.
book will be out first. I have heard from
you indirectly ~~betimes~~ through the girls
to whom you have written. ~~My mother~~ I
have been pleased to hear of your mother's

steady profit recovery. Mrs. Needham
& Anabel are in Chicago visiting
Mrs. N's father & sister, who have re-
turned for a short visit from California
we will all get together here about the
end of this week. My father and sister
are coming up here to make us a
visit the latter part of the month.
I shall expect to have a chance to
show you this place next fall. It is
cool here, Paul had to go to bed last
night to get warm. Fishing is good, and
bathing in the lake (I have been in every
day until yesterday, when a cold gale was blowing)
and the mosquitoes are not bad at all!

Remember me kindly to your mother

Yours sincerely
J. Needham
