

13 East Ave.
Ithaca N. Y.
June 3, 1914.

Dear Hortense,

When the little Sioux River
card found its way into the kind-
ness of fate. you may be sure that
I'm glad that a letter was already
on its way to you. Peterson must
be a very pretty little town and
looks for from being flat country.

The main cause of this epistle
is to return \$6.00 due you from
the Agassiz Club party, but
now that I've found time for
that, I'm going to have a little
chat.

Dozen think you and your
mother and picture your

being busy in a leisurely way
about your home.

The Photo sprout every day
now. Lucy Smith took her exam-
last Frid. and left Mon. Miss
Trayer, Miss Tappan and Miss
Barr have already gone thru
the ordeal - Miss Goudge comes
tomorrow & Miss Moore Friday.

Your desk looks real vacant
now that Lucy has gone, but
Mr. Clemens is to move there for
the summer. Believe -

Bob. exam. comes tomorrow,
So I expect that this week Sat.
night, I shall feel quite like a
free woman.

The Jugatae pictures came to-
day. "Jack" is in the front row

and with flurred glasses, an attempt at
folded hands, and a closed ^{mouth} ^{+ a new spirit}, you
can form a mental picture of its beauty.
The picture as a whole is very good - much
better than last year's -

Dess and Mrs. Merritt entertained the
Glad. Club about two weeks ago. We were
asked to repeat the Alice in Wonderland
scene again for one part of the entertain-
ment. Mr. Clemens was the March Hare,
Lucy Smith, "Alice", "Twin" the Dormouse,
and I had your experience of sitting under
a collapsible. We gave the whole scene this
time, and people were good enough to seem
appreciative at least. We had two flash
lights taken that came out very well,
and now I can get hold of Mr. Clemens
films I will give you some.

The other trunk was a Mock Commence-
ment and was very clever. They made
gay-colored hoods of cheese-cloth and
after a take off on the academic procession
Herz, Prof. Schneider conferred very
clever degrees on people present. The Glad.
gave the Merritt's a Venian rug.

The Cayuga Indian Festival came off
last Thursday and was very successful.
The Annual Jugatae party given by
the Red Hous, at the Field Station came

of a week ago lost snow, and we
enjoyed ourselves immensely.

The Comstock's entertained the
members of Jugatah at the last
meeting of the year. I wish and
I had to miss it on account of a
Zoo trip to the Inlet to catch
Lampreys - The Agassiz Club was
invited to join us, but none came.
The girls either wore bathing suits
or sundies and bloomers so we
could trade unhampered. If we
were fortunate enough to capture
a net, we caught them with that,
otherwise we grabbed for them
with our hands. We caught 231
but didn't eat one. We were
in two rigs and had a very

jolly time.

The Arts are to have the Drew's house for next year, and Isertunde and I just found out yesterday that we can stay here in these rooms again. We are most delighted, for we both dreaded to go into the dormitories to live.

Miss Chapman was here over last Sun. and took her exam-
on her Thesis now. Last Sun. All
some of last year's crowd had a
breakfast for her on the other
side of Belledune. She was looking
very well & happy; likewise Mr. Robbing
Mary Lyon was very enthusi-
astically of their new building,
and seems very happy in her work.

They are all moved now. She found some specimens of *Anax junius* in a little stream near by and nearly swopt for joy at seeing her ^{join} old chum. The people at Dr. Holyoke who have been students of Miss Wallace have raised a little sum to send over for equipment for the new lab. \$400. has already come in.

I wish that you and your mother might see Itasca these days. It certainly is a beautiful spot.

Next week I hope to get out in the field in earnest, and am looking forward to it so much.

Soon the campus will be rather empty for a few weeks, and then the summer school types with the latest styles in everything will appear.

So write when you can - I hope that you all are well -

With much love for you both
From Alice

I guess you'd better address letters to Ag. as I haven't learned our new address yet.

Uncle is sporting mings again, and they are not bilaterally symmetrical, as Uncle was not lying straight when his master cut his hair.
