

Here is a message Mr. Calverton sent / 3 East Ave.
to you ages ago -

"To the Dragonfly Queen, Vaino + Vaineto Thacker N.Y.
with pleasure beyond measure."

Jan. May 10 -
1914

Dear Hortense, It's a long, long time
since your nice rhyming postal came
from Washington, and it's a long, long
time since I've had any one to
be naughty with. Really I have
worked so steadily that my expression
is this. ☹️ I hope that you
don't forget to come back next fall
now, for it is going to be lonesome
and strange with so many old ones
gone.

These spring days I can picture
your mother's joy in being able
to be in her own home. The
season is two weeks late here.

holds forth at Jugates tomorrow on her Potosi. It was only sprung on her last time. and Dr. C. wouldn't let her escape.

Oh, Hortense, you will 😊 show you hear the latest news of Bir Duacy. I guess the combination call on all of us came before you left, didn't it? Well, he invited each of us to one of the Russian Festival Concerts, and left it for us to decide which night we would go. It was a surprise each time he called - for he knew not who would venture forth with him! Miss Moore made lots for us to draw. The Schumann - Hind Concert was fine, and I enjoyed it very much. Miss Moore & I went to a rehearsal of the French music one morning.

It now begins to seem like the end, for already people are leaving. Mrs. Tottell and Mrs. Harper (at) went last week, and Mr. Alder goes Tuesday. Mr. Knight also left about three weeks ago.

We would hardly know that "Jack" existed as far as his appearing in the 4th Floor Linnol. Lab. is concerned. One day, however, he ventured up and asked Lucy if she would go to Gay Blean with the Entomology class. She declined for doesn't even think that "this is a nice man."

We have rented the Montgomery House up on "the Circle" for the summer, and Miss Moore, Gertrude, Miss Broadhurst and myself are the nucleus of its occupants. It will be very handy for Ag. & the Cafeteria.

The Whites are beginning to think of their exams. now, and I'll be glad when they are all through for it must be a strain. Now do write me all about the doings on

Last week we studied The Woodland
Plant Society at Fenwick in Biology.
The violets are in full bloom now,
and with the white flowers of the
litter cress scattered in among them
it is a beautiful sight.

== Elections came off last night.
From our department Mr. Clemens, Tob-
hill, Morrison, Knight, Markowitch,
and Miss Kephart were elected. Others
you might be interested in are Miss
Goudas, Miss. Jenson and Mr. Roblins.
^{Said that once!}
The Banquet comes next Sat. night -

Friday evening we had a "Bee" at
The Lab. and it didn't seem right
without you - especially since it was
a Lantern Slide Bee, and you are
the star performer. It was Miss Morris
"Bee", and Lucy, Reubin, Mr. Miller ^{Buddy}
+ many of his brothers and myself were
present. The reason for this occasion
is the fact that Lady Emmeline
