VERNON,

Mike Newlon has encouraged me to write you to help establish the increased number of a few of the late migrating warblers. I'm not sure of the form you used to but I hope this will do.

Bird	NO. OF	date	location
Le Conte's sparrow	1	4/19	Hickory Hill park Ia. City
Red-breasted Nuthatch	2	5/11	"
yellow-breasted Chat	2	5/18	'
"	1	5/23	Wooded area near Greenfield, Ia.
young Great Horned Owl	3	5/18	Hickory Hill Park
Connecticut warbler	1	5/21	"
"	1	5/22	Greenfield area
Canada Warbler	1	5/21	Hickory Hill Park
"	4	5/24	MARBLE Rock Ia.
'	1	5/25	" (different area)
Mourning warbler	1	5/22	GREENFIELD area
"	6	5/23	"
'	1	5/24	MARBLE Rock
'	1	5/27	Hickory Hill park

Bird	no. of	date	Location
White-eyed Vireo	1	5/22	Greenfield area
Black-throated Blue warbler	1	5/25	Marble Rock

A large number of redheaded woodpeckers were seen in all locations except Iowa city.

Many were seen while driving.

Yellow Warbler population seemed to be doing well although I have no count on them.

As to this form, if there are certain procedures you prefer notify me of them as I hope to be writing you again.

Sincerely

Thomas J. STAUDT
