

9-20-97

Dear Tom,

I spoke to Jim Scheib last night at the reception at Bird Hall. He said I should drop you a line for the report. On Saturday, Sept. 13, 1997 I had a young male evening grosbeak at my sunflower seed feeder. He remained at the feeder without getting off for 15 to 20 minutes. He appeared quite hungry. Ironically, I just saw and heard him again, Saturday Sept 20, around 12 noon. I played a bird call tape to confirm the call. On Sept. 13, he was at our feeder around 2:30. Today he was high flying from one tree to another. Jim said they fly in groups and he probably got lost. I sure hope he finds his way.

Sincerely, Julie Hayek

Julie
