

FALL 1996 Report - Aug - Sept - Oct - Nov.

Marietta Peterrew

RR #1, Box 102A

Walnut, Iowa 51577

Cattle Egret ^{Oct 24}

2 -

In pasture with the cattle
on farm in NW part of
Cass County

Orchard Oriole ^{Aug. 3} - 1 -

a second year male
with a ^{beautiful} Black + ^(Rusty) Burnt
Orange Coat. According to
all the bird books I've read -
the Orchard Oriole disappears -
mid July. This male was
eating weed seeds along the
edge of the pasture near the
trees along the creek
bottom. I was very close to
him + he wasn't bothered by
my presence. This was at
the farm in NW Cass County.

P.S. - Had a pair of Orchard Orioles nesting in the
yard in June + July. ~~This~~ This time it was a first
year male.
