Hi Jim,

Things are busy, but I see a few birds.

We routinely see woodcocks at Hawkeye Wildlife Area, but I haven't seen any for the last 7 days. During June and July, we saw at least 2 each week. We have no idea of the numbers.

Sandy Rhodes reported two downy turkey vultures in a barn on his property. He said he could just see some black feathers coming in. Iowa county, Section 20, NW quarter.

Hope all is well. I have the last of the papers at the printer, so hopefully the rest of the symposium will be published in late September or early October.

Take care

Neil
