Hi Jim -

Nothing much to report for the summer. I assume Sinclair will send you the stuff on Henslow's Sparrow and Hooded Warbler. If he doesn't, my notes show that I had two Hoodeds at Lake Ahquabi on June 7th. Same date found one Henslow's just north of the park a couple of miles. I believe he had more than one bird out there and also found them in another location.

Only other thing of note is that I've had a couple of Loggerhead Shrikes all summer. I presume they nested along the road north of me but have never seen any babies.

Now to work on Arizona reports for Gary Rosenberg. That will take longer!

AJ
