

Dec. 1, 1998

Hi Tom - again -

In looking over records again, I realized that our hawk count had topped two more records from the previous eight years.

These were

Cooper's  
and Roughleg  
along with the two I already listed:  
N. Harriers  
and Turkey Vultures.

After mailing our records to you I just had to go out to see if the brisk NW winds were bringing more birds past the count area.

Along with 5 Redtails and 1 immature Roughleg was an adult Bald Eagle, and a subadult Golden Eagle, which I'd never seen before! Exciting and nice s. low.

Thanks for all the work you do  
for birding in Iowa!  
Beth Proescholdt
