	June	1	m	Monona	Blue Lake area
	June	1	m	Dicinson	Emmerson Bay SP

TNC stands for The Nature Conservancy, so you may not find those areas marked on maps. // is the mark I use for species that I cannot tell the sexes apart. I am also sending you a copy in the mail, but thought this may be faster (it is already late).

Dr. D., - the COLO ?? marks are because I do not know the difference between imm/juv birds & birds that are in winter. Page 1
 - ?? marks by UPFA are - do ♀ birds make that "wolf whistle"?, or only territorial ♂?
 Russ
