IOU FIELD REPORTS FORM Date filed: 7/30/98 p. 1 of 1			
Season: <u>Summer</u>	Year	1998_	Name: Doug Harr Address: Box 65 Larchwood, IA 51241
Other Observers: _			
			entral
Wetlands are low, and	small ba	sins are ne	n very dry, unlike much of Iowa this year. arly dry. However, large insect populations birds this year. Other habitat conditions are good.
Species	No.	Date	Locationcommentsother observers
Red-necked Grebe	3	June-July	Pair reported by Dinsmore hatched 3 young, but 2 disappeared quickly, likely subject to snapping turtles. One young remained with pair in July
			(Jemmerson Slough, Dickinson Co.)
Northern Harrier	2	June 17	Pair seen foraging over western Lyon County grasslandsnesting??
Short-eared Owl	1	May 31	Lone bird foraging over grasslands east of Hawarden, Sioux County.
Blue Grosbeaks	2	June 22	Western Sioux County (others also seen in Lyon, Sioux and Dickinson Counties, but dates not
			recorded). Continue increasing numbers in NW IA.
Dickcissel	abundant	June-July	More birds observed than I recall in recent years, throughout region.
