

Red-throated Loon
13 May 1972
Folsom L., Mills Co., IA
unknown
NBR 40:85, IBL 65:82

Record Number: 94-AC
Classification: NA

REFERENCE

Nebraska Bird Review 40:85, 1972
Records Committee: IBL 65:82

VOTE: 7 NA

NA, This was a good record, seen on the Omaha Audubon Society Spring count by Loren, and I think, Father Hoffman and maybe some others. You'll have to ask Loren for details. No other information to judge as is.

NA, Although this is a relatively easy to identify species, no description is included.

NA, No details.

NA, Unable to evaluate with no details.

NA, No description.

NA, No description given to make a judgment of this record.

NA, Bird seen by Babs Padelford, but no description available, also Father Thomas Hoffman. Fr. Hoffman said 11/17/94 that the bird was in breeding plumage, but he has no notes on the sighting.

The names of the reporters (and of the observers where known) and any special comments are given below in alphabetical order by counties. The number of species for each report is shown in parenthesis. In making this count "Empidonax sp." is not counted if a specific species is also listed.

The alternation of long stretches of unseasonably warm and unseasonably cool weather gave rise to some unusual records.

Adams (169), Hastings; Mrs. O. W. Ritchey (reporter), Brooking Bird Club members including Mrs. A. A. Alberts, Mrs. Wm. Helzer, Mrs. Clifford Kennedy, Miss Vera Maunder, David Rose, Harold Turner, Miss Bernice Welch. A Rufous-sided Towhee was observed by Miss Maunder at a feeder all winter. Blue Grosbeaks nested in the Rose's yard but the nest was broken up by cats before the young hatched. Burrowing Owls were observed in three areas. Yellow-billed Cuckoos were unusually plentiful.

Brown (132), Ainsworth; Mrs. Edith Hurlburt.

Douglas-Sarpy, (223), Omaha and Bellevue; Carl Swanson, Teta Kain, Mrs. S. A. Perkins, Mr. and Mrs. Loren Padelford, R. G. Cortelyou (reporters); Curtis Abdouch, Florence Borland, Mary Denny, Dorothy Ferguson, W. A. Fiske, Katheryn Goodson, Ruth Green, T. A. Hoffman, Tom and F. J. Patterson. Red-throated and Common Loons were reported on Folsom Lake (near Pacific Junction, Iowa) May 13, and Chuck-will's-widows and Whip-poor-wills were reported from the same area June 5 and 14. The latter two had been reported at the Roger Sharpe home (in Iowa, but closer to Omaha) in late April. These reports were not included in the tabulation because they are outside of the area normally included. A lone male Readhead was seen on Lake Manawa at various times during the summer. The Cattle Egret was reported in *NBR* 30:45. The Hoary Redpoll was found at Offutt Base Lake by Terry Maxwell, and was observed over a period of several days by others. It was very white, with a white rump and a distinct lack of streaking on the sides. It could be picked out of the flock of Common Repolls easily without binoculars.
