

June 19

1999

Tom,

I include the prothonotary on the report.
The date is accurate. There were 6 people at
Sodan including Ray Cummins and myself.

Do not include the Lincoln. The date
is accurate but I saw the bird for a short time
at my feeder (under) during a snow storm. They could
have been immature swamper.

Thanks for the note - I should have lectured
~~at~~ the early dates and taken better notes on
the Lincoln.

Tom
