

Walters

February 14, 1977

Dear Mr. Halmi,

Red-tailed Hawk and Am. Kestrel have been in the area all winter.

Two Long-eared owls along with the great horned have been in the area where I live all winter.

Downy woodpeckers and B.C. Chickadees seem abundant at the suet feeder.

Robins and Rusty blackbirds have been in the area all winter. Rusty's have been in good sized flocks in area's of farms where cattle are feed.

See several ⁽⁴⁾ Loggerhead Shrikes on the way to work each day.

Southwest Iowa has large numbers of Harris' Sparrows and Tree Sparrows over some winters.

The number of S.C. Junco seem fewer this winter.

Seen several Ring-necked Pheasant.

Large number of mourning dove in the area this winter.

Horned Lark and Meadow Larks are seen daily.

Number of Common Crow fewer this winter.

Sincerely,

Betty Walters
