

The 1974-75 Snowy Count
Was 80 Snows in Iowa.

Pleasantville La
50225

Feb 1, 1977

Dear Nick; - Finally made it to Post Office
for my mail yesterday Jan 31. Because of
awful weather, hadnt been there since the
previous Mon.

O Boy, did I ever have an avalanche of
mail! Snows + more Snows. The
Count is far greater than the Major Invasion
of 1974-75!!

It now stands at 126 Snows in
63 Counties, I was too tired last nite
to check for possible duplications in
203 counties but even if we have several
it is still a Major invasion.

And I am enclosing a new map
but damn! Snowy shorted on it and just
too tired to go thru that long list again
to pick up the 1 so the map really shows
125 but should be 126. Will have time
tomorrow afternoon to find it - am tied
up today + tomorrow a.m. But I have
all the names, numbers, etc on record
sheets - a matter of going thru 'em again.
Tedious job!

Just thought you would like this
report!

Pigmy Nuthatch in D.M. is really
exciting news.

Wade story about Gray Jay mailed to
Sunday Register yesterday.

Sincerely,
Gladys Black
Last 2 H2O pipes thawed this a.m.!! 4th time frozen!!
