Dear Nicholas: — Rah! Rah!

This evening I watched a Snowy Owl for half an ~~hour~~ perched on a light pole in edge of Warren County about 4 miles west of P. ville along #92. Saw him take off, pounce but did not get his prey, 3 times. A young bird, I think from coloration. Beautiful.

Also Bill Neuseveld wrote they think they have 2 Snowies near Rathbun, different colored birds!

Have had more reports of Snow Buntings + Red-breasted Nuthatches too.

Happy Holidays!

Sincerely
Gladys Black
