extend

Following is a brief summer report on
birds for my locality.

UPLAND SANDPIPER. — Keith Elliott, 6 mi.
west of Lamoni (Benning Co.) reported at his farm he
would see or hear 1 or more, practically, every day
during May & June. Found ^{one} young one haying.

Yellow-headed Blackbird — Keith Elliott
reports them nesting on land he farms 3 miles
W of Lamoni.

House Finch — Quentin Oiler in Lamoni
has 5 to 10 at his feeder every day. This
is 3rd year for the bird at his place.

All common birds of meadow are more
abundant here due to large acreage in
gov. C R P ground.
