This summer the weather has been remarkably wet. The rivers have frequently flooded which has led to some uncommonly large numbers of herons being present. I only reported the Egrets as I deemed them unusual enough to report for my area. We had a summer tanager nest in Lamb's Grove but did not determine whether the young fledged. Some shore birds were also seen in the flooded area along I 80 but was unable to stop and determine which ones were present. My list for this season is short but....
