Hey-

I talked to Scott Rolfes yesterday and he mentioned a couple of sightings that might be of interest for the summer field reports:

1. American White Pelican - up to 30 summered at Saylorville
2. Willet - 28 on 2 July at Saylorville

I handed in a draft of the final chapter this morning - should have comments in a couple of days. The I can revise over the weekend or on monday and get it to my committee late monday.

Steve-0

P. S. I am having dinner with the Zaletel's this evening.
