Hello,

Just a note to say that Craig (of Neal Smith NWR Staff) has been doing bird surveys in the buffalo/elk area this year. He reports five singing male Henslow's Sparrows within the buffalo enclosure. As far as I know, this area consists of several 1994-1998 plantings and has not been burned for at least two years.

I have been doing bird surveys over the rest of the Refuge this year, but have not seen Henslow's Sparrows.

Liessa Thomas
