Dear Mr. Dinsmore:

I have another early sighting to report to you. Yesterday, about 5:30 P.M. my wife and I sighted six Horned Grebes (still in winter plumage) on Cedar Lake in NE Cedar Rapids. They were swimming with a flock of over 300 Common Goldeneyes, a few Common Mergansers, three Hooded Mergansers, and a couple of Lesser Scaups. The weather was cloudy, in the high 40s, with a gusty wind of up to 25 or 30 mph. A rain and snowstorm was approaching. I hope this information is useful to you.

Sincerely,

Herbert F. Wiese
